ATHARVA B. KALE

508-492-8669 • atharvakale@outlook.in • linkedin.com/in/atharvabkale

EDUCATION

The Pennsylvania State University
Bachelor of Science: Mechanical Engineering State College, PA
GPA: 3.32
Scholarships: Harvey J. Bomberger Memorial Scholarship; Broughton Scholarship in Engineering
Relevant Coursework: Heat Transfer, Control Systems, Thermodynamics, Circuits Design, Fluid Flow, CAD Design, Machine Design, Manufacturing Processes

WORK EXPERIENCE

Amazon Inc. **June 2025 - Present**
Area Manager *West Sacramento, CA*

- Directing a 24-member team in high-volume delivery operations, achieving 100% on-time dispatch and boosting throughput by 18%
- Spearheading targeted improvement initiatives that enhanced operational efficiency by 7% while strengthening quality control and defect prevention practices
- Partnering with cross-functional engineering and supply chain leaders to implement automation-driven workflows, improving coordination efficiency and reducing cycle times across reverse logistics

CITEL Laboratory **September 2024 – May 2025**
Research Assistant *State College, PA*

- Evaluated thermal performance of hempcrete blocks across 5 residential projects, achieving R-values of 0.44–0.53 $m^2 \cdot K/W$ for up to 20% greater insulation efficiency than the standard fiberglass insulation.
- Analyzed energy data to identify 25% potential savings in heating and cooling costs and a 12% boost in overall building sustainability
- Compiled a comprehensive report outlining methodology, results, and hempcrete design recommendations to enhance energy conservation by 30+ kWh/m^2 annually

Amazon Inc. **June 2024 – August 2024**
Area Manager Intern *Syosset, NY*

- Supported operational leadership at Amazon's highest-volume Delivery Station in North America (DYY9), processing over 100,000 packages daily.
- Directed associate tasking and real-time workflow adjustments to maintain throughput targets and operational accuracy.
- Designed and implemented a macro-enabled Excel optimization tool that streamlined key processes and improved shift efficiency by more than 15%.

PROJECT

PCB-less Mouse - Logitech (Best Project Award) **January 2025 – May 2025**
CAD Designer *State College, PA*

- Designed and prototyped a PCB-less computer mouse, reducing carbon footprint by 40% and copper waste by 70% in alignment with Logitech's sustainability roadmap
- Secured 2nd place among 100+ capstone projects by delivering a fully functional proof-of-concept

SKILLS

Technical Skills: AutoCAD, SolidWorks, MATLAB, Simulink, CFD, CATIA, Abaqus, GD&T, Revit, Fusion 360, Excel (VBA), Additive Manufacturing

Practical Skills: Production Scheduling, Troubleshooting, Team Leadership, Supervision, Cross-Functional Collaboration, Root Cause Analysis, Safety Compliance
